

Question:
What do these people have in common?

1. Mary is an entrepreneur. She has been having staffing issues in spite of repeated failed attempts to remedy the high turnover.
2. Sarah and Bill have relationship problems. They love each other, but several emotional triggers keep their relationship tense and edgy.
3. Steve is forty pounds overweight. He's tried several diet programs, exercises five days a week, and is on a regular detox regimen. Yet he still can't lose weight.

Perception Index Zones

- | | |
|-----------------------------|----------------------------|
| 1. Unacknowledged | 7. Anger |
| 2. Repetitive Thinking | 8. Fearful and Overwhelmed |
| 3. Sadness | 9. Suppressed Emotions |
| 4. Emotionally Disconnected | 10. Unworthy / Undeserving |
| 5. Self Critical | 11. Rigid Beliefs |
| 6. Conditional Love | 12. Conflicting Beliefs |

Perception Reframing

What do these people have in common?

Their deep-rooted emotional roadblocks may be keeping them stuck in a pattern of physical and emotional disharmony.

Unresolved emotional roadblocks often contribute to physical symptoms and may cause people to repeat unproductive behaviors.

One of the fastest ways to blast through these roadblocks is Perception Reframing; changing the way we see events, circumstances, other people, and ourselves.

Perception reframing uses the energy of the voice to map perception and track progressive changes. It's effective because you engage every aspect of your being, including your memories and beliefs.

When you speak of a specific topic (person, event, ability, etc.) your voice will carry the perception you hold about the topic.

The software records and plots that voice energy into what is called a Perception Index. During a session you'll see the Perception Index shift, indicating a reframe of the perception.

Perception reframing may improve any area of human performance and is often life changing.

We can help with issues like:

- Emotional Stress
- Athletic Performance
- Sadness
- Weight Problems
- Addictions
- Recurring Pain
- Work Performance
- Anger
- Relationship Issues

Better Outcomes...Faster Results

Perception of any topic will be reflected in its specific Perception Index, a voice pattern comprised of multiple frequencies.

When you have a wellness issue, an emotional challenge, or can't break a habit, your perception is often reflected in your voice.

How the bio-communications technology system facilitates lasting changes:

1. The system records a 10-second slice of your voice energy and displays it on the computer as a Perception Index.
2. Using a stimulus-response exchange called a biosurvey, the software selects the appropriate missing frequencies.
3. It then sends that information to your bodies energetic field while you listen to music and think about the topic, event, or person of which you are speaking.
4. Your voice shifts as a reflection of the shift (reframe) in perception. You are then able to see things in a new way. This will allow you to leave behind subconscious roadblocks and negative emotional baggage.

Our support technology provides general wellness information, including information about biological coherence. The diagnosis and treatment of medical conditions should only be undertaken by qualified medical professionals. Our bio technologies are not intended to be used in the diagnosis, cure, treatment, mitigation, or prevention of any disease or other medical condition.
